NO MORE COLDS! NO MORE WEAK LUNGS!
DON'T FAIL TO BUY

CONGERS' PATENT "CHEST-SHIELD" UNDERSHIRT.

It protects the Lungs without the use of Extra Lung Protectors.

Recommended by leading physicians as a garment of great value to all who are exposed to the rigors of our changeable climate or have a tendency to any lung difficulty.

FRONT VIEW

Merino and all Wool

BACK VIEW

The "Chest-Shield" is double, both Front and Back (remember the lungs are as much exposed on the back as in front), the dotted lines in the cut show the portions made double. The lungs are thus protected and security is afforded from pulmonary complaints, incident to sudden changes of the weather, &c.

The "Chest-Shield" in Scarlet is recommended particularly, for its great anti-rheumatic qualities.

TRY IT AND YOU WILL USE NONE OTHER.
